

IML & LOOMIS SAYLES ADVISER ROADSHOW

With many sharemarkets recently reaching record highs thanks to record low interest rates and volatility returning to the market, a disciplined, research-focused approach to stock picking remains critical in today's markets.

Our portfolio managers will discuss how they go about uncovering opportunities in Australian and Global equities, and identify key companies for their portfolios which meet their strict quality criteria.

There will also be the opportunity to ask questions to our speakers.
